Education

Guru Tegh Bahadur Institute of Technology *Aug 2022 – May 2025*
B.Tech in Artificial Intelligence and Data Science CGPA: 7.86/10
Relevant Coursework: AI, Data Science, Machine Learning

Guru Tegh Bahadur Polytechnic Institute *Aug 2019 – May 2022*
Diploma in Computer Engineering CGPA: 8.68/10

Skills

Languages & Databases: Python, SQL
Machine Learning & AI: Predictive Modeling, Unsupervised Learning (Clustering), Natural Language Processing (NLP), Large Language Models (LLMs), Scikit-Learn
MLOps & Engineering: Docker, AWS (EC2/ECR), CI/CD (GitHub Actions), DVC, MLflow, Flask, Streamlit, REST APIs, Git
Data Analytics & Visualization: Power BI, Tableau, Pandas, NumPy, Data Storytelling, Business Analytics

Projects

Customer Segmentation & Business Analytics Framework
Tech Stack: Python, Scikit-Learn (K-Means, Random Forest), Pandas, Streamlit, Power BI

- Built an end-to-end ML segmentation engine analyzing 500K+ retail transactions, projecting a **10.01% revenue uplift** through targeted marketing interventions.
- Engineered a scalable **"Cluster-Then-Predict"** architecture (K-Means & Random Forest) for low-latency inference, isolating high-value cohorts driving **43.7%** of total revenue.
- Delivered self-service Power BI executive dashboards using a Star Schema data model to translate complex datasets into actionable **CRM insights** for stakeholders.

NYC Taxi Tip Predictor (End-to-End MLOps Pipeline)
Tech Stack Python, Scikit-Learn, DVC, MLflow, Flask, Docker, AWS (EC2/ECR), CI/CD

- Built a predictive machine learning pipeline to forecast ride-share tips with a highly accurate **$1.22** MAE, translating raw TLC dataset trends into actionable ROI routing strategies for drivers.
- Developed scalable Python **automation frameworks** using DVC (Data Version Control) and MLflow for robust feature engineering (cyclical/spatial encoding) and hyperparameter tracking.
- Took complete ownership of the ML lifecycle by serving real-time inferences via a Flask web application and automating **CI/CD** deployment using Docker, GitHub Actions, and AWS (EC2/ECR).
- Link: https://github.com/mann-lean/data-science-project/tree/main/nycTaxiProject

TalentFit Shortlister – AI Powered Resume Analysis System
Tech Stack: Python, Flask, NLP (BERT, TF-IDF), React.js, Scikit-learn, Regex, PyMuPDF

- Developed an AI-enabled NLP application to **automate high-volume candidate screening**, generating accurate JD-match percentages to eliminate manual parsing bottlenecks and improve operational efficiency.
- Built an end-to-end automation framework that translates unstructured text data into actionable hiring metrics, featuring an integrated system to **automatically dispatch selection emails** to shortlisted candidates.
- Link: https://github.com/mann-lean/TalentFit-Shorlister

Experience

Codsoft, Data Science Intern *Aug 2024 (4Weeks)*

- **Advanced Data Wrangling:** Leveraged SQL (complex joins, CTEs) and Pandas to extract and clean large-scale datasets, ensuring data integrity for analytical modeling.
- **Statistical Analysis & EDA:** Conducted deep-dive Exploratory Data Analysis to identify customer patterns and anomalies, translating raw data into predictive insights for product strategy.
- **Data Storytelling:** Designed interactive dashboards using Plotly, Seaborn, and Matplotlib to present technical findings to non-technical stakeholders, facilitating data-driven decision-making.

Codsoft, ML Intern *Aug 2023 (4Weeks)*

- **End-to-End Model Development:** Developed and fine-tuned classification models using Scikit-learn, implementing the full lifecycle from feature engineering to model evaluation.
- **Performance Optimization:** Optimized model metrics including Precision, Recall, and F1-score, ensuring high-reliability predictions for business use cases.
- **Technical Documentation:** Standardized ML workflows and data pipelines to ensure reproducibility and transparency for cross-functional technical reviews.
